-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claim 1 is rejected under 35 U.S.C. 102(e) as being anticipated by Bell.

Bell shows a system for cooling a user having a head, the headwear having a cavity for receiving the head of the user, a front, and a rear, comprising;

- an integrated water supply and pump 56 including a container 30 for holding a quantity of water, an outlet port, and a handle for pressurizing the container and initiating water flow out of the output port;
- a front misting nozzle 66 as recited oriented generally rearwardly toward the user when the user is wearing the headwear; and
- at least one conduit 62 as recited.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Art Unit: 3752

4. Claims 2 and 3 are rejected under 35 U.S.C. 103(a) as being unpatentable over Bell in view of Lopa et al.

Lopa et al. teaches an apparatus for dispensing liquid on a wearer's head comprising a flow valve 74 between a front discharge nozzle 36 and an outlet port of a fluid container 22 for allowing the user to control flow through at least one conduit 24 to the front discharge nozzle and a rear nozzle to spray fluid toward the back of the neck as recited in claim 3. It would have been obvious to one having ordinary skill in the art at the time the invention was made to have modified the device of Bell by incorporating a flow valve between the front misting nozzle and the output port and to have provided as rear misting nozzle as taught by Lopa et al. to allow the user to control flow through at least one conduit to the front misting nozzle and to cool the back of the neck of the user.

Allowable Subject Matter

5. Claims 4-10 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The patents to Naaman, Klatz et al., and Apisdorf are pertinent to Applicant's invention.

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Davis D. Hwu whose telephone number is 571-272-4904. The examiner can normally be reached on 8:00-4:30.
